**innovation | collaboration software | gamification | data science | NLP?**

Keen on quickly taking on responsibilities in a startup?

## FULL-STACK DEVELOPER POSITION

WeDaVinci

**WeDaVinci** is a web-based, NLP-powered collaboration software. We give people a platform for their ideas, to showcase their expertise and motivate them to collaborate on innovative endeavors.

WeDaVinci is supported by EXIST and has been part of the LMU Entrepreneurship Center. After several successful projects, e.g. with the UN World Food Programme Innovation Accelerator on “Zero Hunger”, we are now embarking on projects with an increasingly large userbase, taking WeDaVinci to the next level. For the road ahead, we are looking for a full-stack web-developer to join us on the adventure.

### Your role

You'll take on responsibility for the product early on and get insight into several future-relevant topics: Data science, Natural Language Processing (NLP), social networks, and gamification.

You'll be working closely together with experts and at the same time take on great responsibility for the web-development of the product.

### About You

- You have experience in web-development (ideally with MEAN-stack and MySQL)
- You have experience maintaining a codebase in a team
- You like exploring new fields
- You have a strong drive to make a good product great

Besides gaining valuable work experience, getting responsibility early on and working on highly future-relevant topics, you will earn a good salary, have great opportunities with the growth of the company and the chance to a leadership position.

If this sounds interesting to you, get in touch! Send us your CV and a short description of your motivation to [veronika.gamper@wedavinci.com](mailto:veronika.gamper@wedavinci.com) or reach out to +49 176 63359677.

We look forward to hearing from you!
