IDPs

WeDaVinci is a web-based, NLP-powered collaboration software. We give people a platform for their ideas, to showcase their expertise and motivate them to collaborate on innovative endeavors.

WeDaVinci is supported by EXIST and has been part of the LMU Entrepreneurship Center. After several successful projects, e.g. with the UN World Food Programme Innovation Accelerator on “Zero Hunger”, we are now embarking on projects with a large userbase, taking WeDaVinci to the next level.

IDP Topics

- **Data Pipeline: #ETL (Extract Transform Load) #Data Warehouse #RTP (Real Time Processing)**
You will be responsible for the design and implementation of an ETL (Extract, Transform, Load) pipeline, that will load raw data from a MongoDB into another database. You research and evaluate the choices (MySQL, ElasticSearch, ...) and implement it. The database will allow to display KPI (Key Performance Indicators) to customers.
- **Natural Language Processing and Machine Learning: #NLP #Machine Learning #ML**
At WeDaVinci, we use NLP and ML methods to gain insights on large text datasets. We use classical and recent deep learning algorithms. You will get your hands dirty, evaluate and design new ML models. You will work closely with our backend developers and also do some backend tasks yourself.
- **Additional IDPs: Innovation Management KPI dashboard, Game module** (ask us)

Our Offer

- Gain insights into several future-relevant topics at WeDaVinci:
Data science, Natural Language Processing (NLP), Social Networks, Gamification
- You work on a startup with a great product, based on a modern tech-stack
- We give you lots of responsibility
- Gain insights into the Munich Entrepreneurship scene
- Central Location, high flexibility to coordinate the IDP with your studies
